

Healthcare hits reset

Priorities shift as healthcare leaders navigate a changed world

[Download report](#)

The Future Health Index 2022 is the largest global survey, analyzing the top priorities and concerns of almost 3,000 healthcare leaders in 15 countries, including around 150 informatics specialists

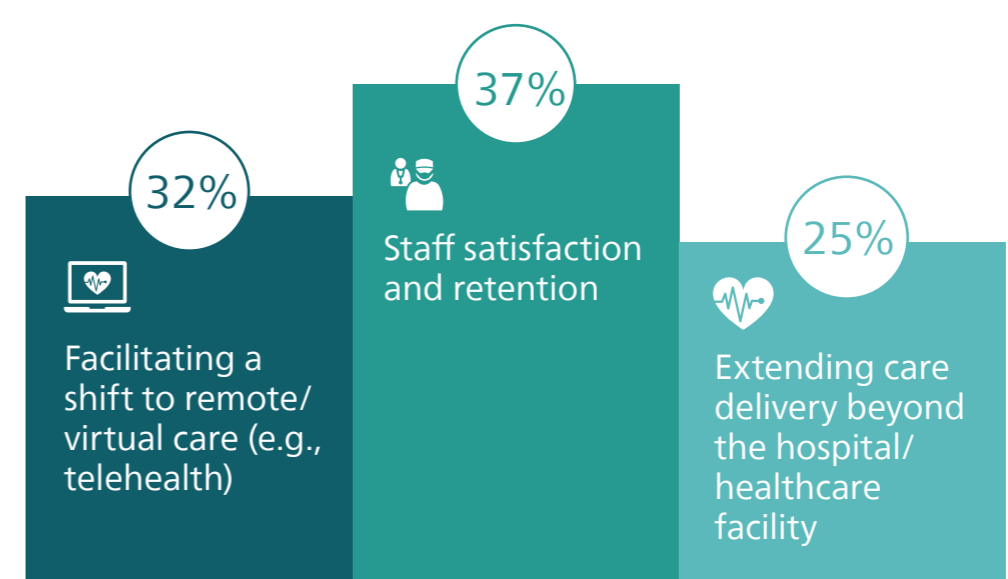

Informatics healthcare leaders are radically shifting their priorities as they navigate a new world

Emerging from the pandemic, Informatics healthcare leaders identify three key challenges for 2022 and beyond.

Alleviating clinician shortages is top of the agenda for informatics leaders

Apart from delivering high quality care and ensuring the financial health of their hospital/healthcare facility, staff satisfaction and retention rank as the highest concern for Informatics healthcare leaders, both today and three years from now.

Top priorities for informatics healthcare leaders

Informatics leaders see the biggest impact of predictive analytics on:

Paving the way with AI and predictive analytics

Informatics healthcare leaders see AI and predictive analytics as key to meeting their priorities.

Strong confidence in data

Informatics healthcare leaders have confidence in the data available to them, however impediments to optimal data utilization, including a lack of staff training and data overload, remain.

Accelerated by the pandemic, the healthcare sector has undergone a dramatic transformation

In response, leaders have radically shifted their priorities. The report emphasizes three imperatives for healthcare leaders that are key to resolving these challenges.

Improve staff experience

Bridge the gap between the promise of predictive analytics and current usage

Address healthcare data security threats

The Future Health Index is commissioned by Philips

The Future Health Index 2022 report examines the experiences of almost 3,000 healthcare leaders and their expectations for the future. The research for the Future Health Index 2022 report was conducted in 15 countries (Australia, Brazil, China, France, Germany, India, Indonesia, Italy, the Netherlands, Poland, Russia, Saudi Arabia, Singapore, South Africa, and the United States). The study combines a quantitative survey and qualitative interviews conducted from December 2021 – March 2022.
